About Scaleway

About us

Founded in 1999, Scaleway, the cloud of choice, helps developers and businesses to build, deploy and scale applications to any infrastructure. Located in Paris, Amsterdam and Warsaw, Scaleway's complete cloud ecosystem is used by 25,000+ businesses, including European startups, who choose Scaleway for its multi-AZ redundancy, smooth developer experience, data centers that run only on renewable energy and native tools for managing multi-cloud architectures.

With fully managed offerings for bare metal, containerization and serverless architectures, Scaleway brings choice to the world of cloud computing, offering customers the ability to choose where their customer's data resides, to choose what architecture works best for their business, and to choose a more responsible way to scale.

Our vision

Enter the multi-cloud era with Scaleway, the cloud of choice.

We believe that businesses need to be free to choose where their customer's data resides, to choose what architecture works best for their business, and to choose a more responsible way to scale. With our complete range of cost-effective and fully managed services, and our European regions (Paris, Amsterdam and Warsaw), Scaleway is the first multi-cloud service provider.

Our multi-AZ redundancy, smooth developer experience, data centers that run only on renewable energy, predictable billing, comprehensive documentation, and native tools are what you need to manage your multi-cloud architectures.

Our mission

Our mission is to help developers and businesses to build, deploy and scale applications to any infrastructure. We bring choice to the complex world of cloud computing, as the first multi-cloud service provider.

Our corporate citizenship

Our efforts as a regional and global citizen deliver meaningful and measurable progress that positively impact our customers, partners, investors and people. We have a responsibility to them to act ethically and with respect for our modern society and the environment. We are implementing a list of actions across the whole chain, from eco-friendly and environmental solutions, transparency and trust, to equality, parity, inclusivity and ethics.

Our programs

Scaleway for Startups is designed to support startups via cloud credits and technical guidance, and create a network that members can benefit from via both public and private events. Startups joining the programs are featured on our social media accounts, have the opportunity to share their news with our whole community, and announce their product releases.

The Scaleway **Open Source Program** is a time-limited (but renewable) cloud computing partnership program designed to support open source programs. Projects supported by us receive up to €2,400 worth of cloud credits, a dedicated program lead, visibility and awareness, and get access to a global community and exclusive content.

Scaleway's **Academia Program** aims to make our open and inclusive vision of the cloud a reality. To do that, we pledge to provide students with knowledge that is vendor agnostic, and that uses as much open source technology as possible.

Key figures

Key figures

Scaleway is the cloud of choice.

Developers and businesses can build, deploy and scale applications to any infrastructure with Scaleway.

Highlights:

- Most complete cloud ecosystem in Europe
- Control your customer data residency
- Responsible
- Interoperable
- 25,000+ businesses, including European startups, choose Scaleway
- 550+ Scalars
- 8 data centers, all powered by renewable energy sources and fairly regulated:
- 3 regions (PAR, AMS & WAW)
- 7 availability zones (AZs):
 - 3 in PAR (across 4 data centers)
 - 2 in AMS (2 DCs)
 - 2 in WAW (2 DCs)
